Dear Student-teachers,

As you know teacher training programs at URCE aims at producing effective educational practitioners who are well prepared to address the various challenges in educational setting. It is in this regard that during your school attachment you are also required to conduct an action research with the purpose of solving the identified problem or obtaining more information about it so as to inform the local practice on how to solve day-to-day problems in schools for the improvement of both student learning and teacher effectiveness.

However, due the challenges caused by COVID-19 pandemic, your supervision was not carried out as planned so that you can physically meet with your supervisors to receive their guidance. Therefore, **the recommendable option is to work with them online**. To this end, **the contact details of your supervisors are available on the URCE website (www.ce.ur.ac.rw)**. You are therefore requested to **get in contact so that you start working with them in matters related to your action research**. I would also like to let you know that once cross-districts movements will be possible, supervision of your teaching will start immediately.

Thank you very much for your usual collaboration in effort to make school attachment successful and professional.

Dr. Innocent K. Twagirimana

Ag. Dean, SoE
